

FOSSILS

Look at the large samples and then find similar ones in the walls etc of the church.
Where did you find them? If you find another sort of fossil draw it and say where it was.

	Where eg porch, main church at front or back, tower, buttress at east end, modern part at back	What sort of rock (if you know)
 <p>Crystals inside Brachiopod shell</p>		
 <p>Shell fragments</p>		
 <p>Belemnite (cut cross)</p>		
 <p>Burrows</p>		
<p>I also found</p>

LADBROKE CHURCH ANSWERS

	Where eg tower, wall, modern extension	What sort of rock (if you know)
 Crystals inside Brachiopod shell	Tower (recent repairs at low level)	Ironstone - Great Tew
 Shell fragments	Various including tower, buttresses and modern extension at the back	Ironstone - Great Tew
 Belemnite (cut cross)	Modern extension, also several windowsills (may be too high for children to see)	Ironstone - Great Tew
 Burrows	Various, tower, new buttresses, modern extension, repairs to main church at front (also in some of rougher old Hornton stone at the back of the church where there are ridges in some stones and raised circles in another)	Ironstone - Great Tew (and Hornton)
I also found	High up on new east buttress Crinoid (related to sea urchin) had a long stemmed with fronds at the top. This is a cross section of the stem.	Ironstone - Great Tew
	If samples from Church Cottage on display: Ammonite(s) found when digging the foundations for the new part of the house	Blue Lias (check)
	Tiny shells in some white gravestones	Limestone - oolitic
